Summary

I'm a MERN Stack Developer who enjoys building modern, responsive, and scalable web applications. I have experience developing interactive front-end interfaces with React.js and building RESTful APIs using Node.js, Express.js, and MongoDB. I focus on writing clean, maintainable code and creating applications that are both efficient and user-friendly.

Featured Project

Share Your Emotion (SYE) Social Media Platform

React js | Tailwind CSS | Zustand | Node js | Express js | Mongo DB | Cloudinary | JWT

A full-stack MERN E-commerce application with separate customer and admin dashboards. Features include product, category, coupon, order, and user management, along with shopping cart, checkout, and secure authentication.

More Challenges

- Express Session authentication with JWT tokens
- Product, category, coupon, and order management
- Shopping cart and checkout workflow
- Image upload with Cloudinary & Multer
